

# Bridging

- Main use of bridge is VM frontend
- Most setup automated
- Except odd user

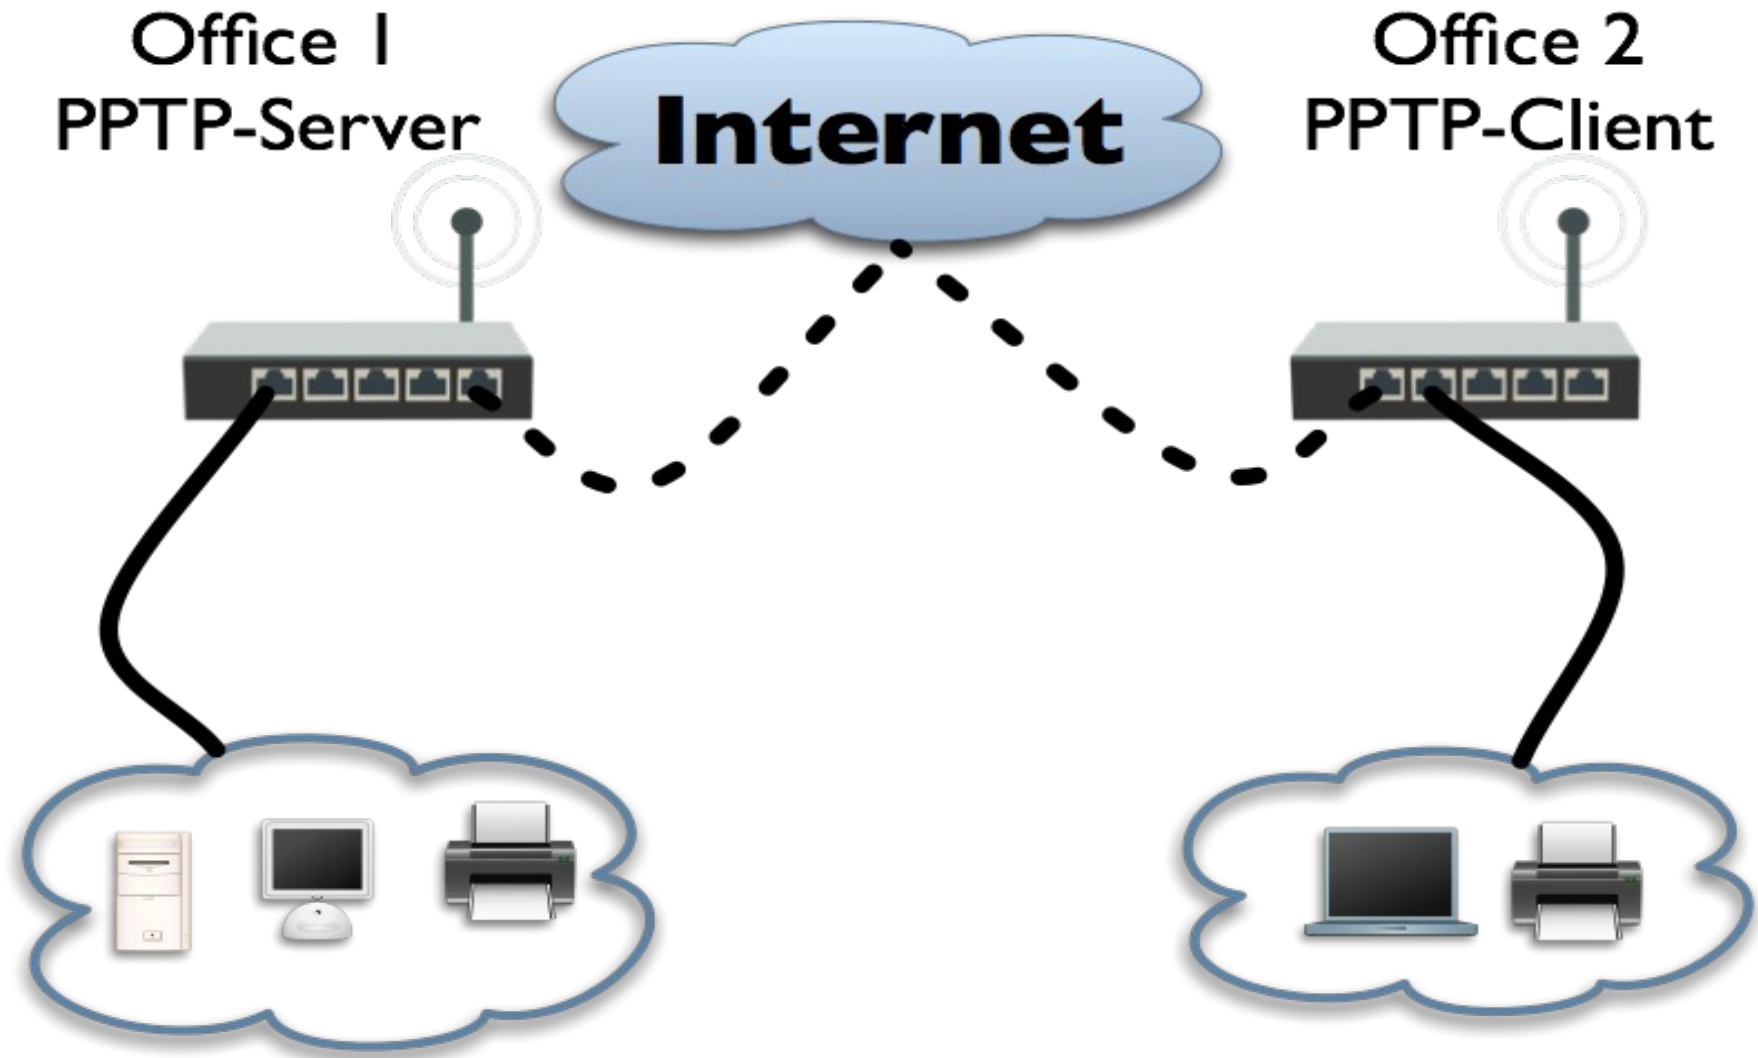

# RSTP

## Rapid Spanning Tree Protocol

- Code based on rstplib
  - Stagnant
  - No distro
- Code from EMC
  - Certification tested
  - Ugly
- Kernel version?
- Migration issues

# BCP

## Bridging PPP tunnels

# VEPA

- Push routing out to hardware
  - VM's send to bridge
  - Bridge bounces out to external hardware
- Implement in bridge, macvlan, tun, or all
